Data Disclaimer

The information and data provided are released "as is," without any warranties, express or implied, as to their accuracy, completeness, reliability, or fitness for any particular purpose. Users acknowledge and accept the data in its current, unverified form, and agree to use it at their own sole risk.

This data has not undergone quality assurance or quality control (QA/QC) processes. As such, users are responsible for conducting their own validation and employing appropriate risk management measures before using the data for any purpose.

No specific support will be provided in relation to this data. Supporting resources that are typically available—such as metadata, data dictionaries, or system access—may not be included. Furthermore, the data may not be compatible with standard GSWA-supported systems.

The information or data must not be:

- Shared with third parties,
- Published or referenced in any geoscientific or commercial publication, or
- Displayed in any format that enables access or use by third parties.

GSWA accepts no responsibility for errors, omissions, or any outcomes arising from the use or reliance on this information.
